

## **Are you, as parents, concerned or disturbed about the development of your child?**

### ***Do you observe that your child as a baby***

- cries a lot and is hard to calm down
- does not move much
- does not grab many different things
- rarely keeps him or herself busy
- is fidgety and unable to concentrate on something for long
- is very reserved, is anxious or doesn't see any dangers
- needs a lot of time to learn something new
- is not interested in other children (above 3 years)
- hardly imitates actions, sounds or words

## **Do you feel insecure about the education of your child?**

### ***Do you experience that your child***

- is overly trusting or very shy with strangers
- quarrels a lot with other children
- is unable to accept a "no", often does not seem to listen at all
- can't keep agreements
- often breaks things unintentionally
- has heavy rage attacks
- cannot sit still

## **Are you concerned as parents about the development in speech and communication of your child?**

### ***Do you observe that your child***

- makes very few sounds or hardly babbles as a baby
- has difficulties to express him or herself and just speaks little
- stutters
- leaves out many syllables in a word
- is unable to create simple sentences
- is hardly understood by others and feels excluded
- often doesn't understand you

Would you like to understand why your child behaves like that and how you can positively support her or him? Do you wish to get personal and specialised advice? Then early remedial education can be the offer, which supports you with words and deeds. The early-education centre of your region (canton) provides you with the necessary information. The addresses can be found [here](#).
